Forecast for Thursday 27 Aug 2020

Weather: Dry but cloudy through the early hours. Largely dry to start the day, but patchy rain by late morning. Rain turns heavier and more persistent for a few hours around late afternoon or early evening. Further light rain overnight.

Chance of cloud free mountain/hill tops above 700m: 80% during the day with cloud mostly above the summits. Falling to 10% or less through the evening as persistent cloud lowers to around 300-400m.

Visibility: Occasionally good, but often falling to around 5-10 km in rain. Falling poor at height at the end of the day as low cloud thickens.

Meteorologist's View

Some uncertainty about persistence of the rain, but expect rather damp conditions.

Forecast for Friday 28 Aug 2020

Weather: Rain through the early hours. Turning largely dry shortly after dawn with sunny spells and a few well scattered showers. Dry with clear skies overnight.

Maximum wind: North-northeast 15-20 mph, increasing 20-25 gusting 35 mph after dawn. Turning more northerly through the afternoon.

Chance of cloud free mountain/hill tops above 700m: 30% in the morning, cloud frequent above 600m across eastern fells, but well broken and occasionally above the summits in the west. 90% in the afternoon, cloud bases largely above the tops.

Visibility: Often poor at height in the morning, especially in the north and east, otherwise good. Becoming very good in the afternoon.

Temperature: **Valleys:** Plus 9 Celsius rising to 15 Celsius
At 700m: Plus 7 or 8 Celsius, falling to plus 5 Celsius after dark.
Freezing level: Above the summits.
